# my own file.

the pages to fill in once and keep — so the next time something happens, you're not starting from zero. your documents, your accounts, your numbers, your people, and your plan, all in one place.

KEEP IT SAFE

never write full account numbers, passwords, or PINs on paper. the last 4 digits and where to find the rest is enough.

if someone at home might go through your things, keep this somewhere only you can reach — a work locker, a trusted friend, a safe-deposit box — or fill in only the "where it's kept" columns.
